

DRAFT · NOT FOR RELEASE · CONTACTS PENDING VERIFICATION

Pause before sending a file, showing a screen, starting a recording, or uploading data. Check the purpose, people, content, and route.

Before you share: check

- 1 Purpose:** Is this use authorized for this task? Check the engagement and client instructions before any new use.
- 2 Minimum necessary:** Include only what the recipient needs. Removing names alone does not make a document anonymous or public.
- 3 People:** Verify identities, attendees, recipients, and need-to-know access. Check the exact link permissions and recording audience.
- 4 Content:** Review screens, comments, speaker notes, hidden content, metadata, and unique client details before sharing.
- 5 Route:** Use the approved workspace, account, tool, and restricted sharing method. An NDA or approved tool does not authorize every use.
- 6 If it went wrong:** Stop further sharing. Report promptly even if you recalled a file or removed a link. Preserve the facts; let responders assess exposure and notices.

Contacts and routes

For	Route
IT help and general support	ithelp@synozur.com (published IT support address)
Privacy concerns/questions, including misdirected files, public links, or unintended uploads	privacy@synozur.com
Security issues	security@synozur.com
Access, correction, deletion, or restriction requests	[TO CONFIRM BEFORE RELEASE: approved route for access, correction, deletion, and restriction requests]
Legal hold or disposal conflict	[TO CONFIRM BEFORE RELEASE: legal-hold process and contact]
Client-specific handling requirements	[TO CONFIRM BEFORE RELEASE: client-specific requirements and engagement-owner route]

For privacy concerns/questions, including misdirected files and unintended uploads, contact privacy@synozur.com. For security issues, contact security@synozur.com. This does not confirm a distinct urgent security incident-response procedure, if one applies. ithelp@synozur.com is for IT help only, not privacy reporting or an urgent incident hotline. Do not send copies of exposed data in a report unless responders ask.
